I've only heard a little about your Silverton project. Sounds like a nice area though. I'm not familiar with your contract setup (with expiring RAC) but are there any areas where we could support you on? Sounds like you are pretty tapped on preparing for the upcoming field season and you may be set, but if you were looking for support, I could look for avenues to support you on.

Hey Tommy,

Good to hear from you. Yes, things have been a bit crazy. We don't have much contractor support right now, so I'm doing a lot of the leg work on getting ready for the 2015 sampling events in Silverton. The site isn't listed yet, but is going to get rolling eventually. It is a huge mining district, with a large eco risk component. I'm learning all of the players and partners and history on the site. I've been traveling down there 1-2 times per month. Its beautiful, but also difficult to get to.

Subject: Check in

Hello from Libby, Liz! Hope you are doing well. We are in the process of getting ready for the field season and was going through some 2014 emails regarding soil disposal (remember that?) – came across some emails between you/me and thought I'd just check in to see how things were going for you. I believe when I was in Denver in March, you were at your Silverton project public meeting. Was good to catch up with Matt and hear about his 3am cleanup jobs.
